SUBJECT INDEX

Ability
  gender differences 37–62
  hierarchical models 40
Academic self-schema 63–76
Accounts, students with learning and social disabilities 125–141
Action-centered skill 331
Anxiety, teaching expectancy and learning 23, 26, 28, 33
Apprenticeship 237–259, 401
Architects, theory and practice 337–355

Beliefs and knowledge, teachers 292–312
Boundary crossing, expertise 320–333

Certification system 410
Classroom interaction 240
Cognition of Figural Relation (CFR) 40, 44
  gender differences 53, 54, 57
Cognition of Semantic Relations (CMR) 40
Cognitive ability, gender differences, multivariate hierarchical approach 37–62
Cognitive apprenticeship model 238
  learning interaction 240–256
Cognitive psychology, professional knowledge 412
Cognitive restructuring 389
Cognitive strategies 170, 178, 182
  learning journals 172
Coherent representation 203
Collaborative cognition 323
Competence, knowledge and design 362, 368, 374, 376, 380
Comprehension monitoring, high and low ability children 143–164
  measurement 150
Comprehension strategies, knowledge and use of text structure 203–219
Computer-writing and revision, individual and cooperative 101–122
Computers, collaborative learning 241
Concept-based training 294, 296, 308
Concept-pair test, teachers knowledge and beliefs 297
Conceptions of learning 168, 176, 181
Conceptual knowledge 271, 273, 275, 292, 337, 385, 415
Constructivist learning theory 389, 393
Contextual learning module 395
Cooperative learning 238
  computer-writing 104–122
Crystallized intelligence 40, 43
  gender differences 52, 56

Decoding 198
Deep processing 393
Design
  architects, psychological concepts of knowledge 337–355
  engineering, problem solving 357–383
Diagnosis
  medical, theory and practice 272, 276, 287
  teachers, knowledge and beliefs 293, 306
Direct Intervention Programme (DI) 205–219

Effective learning 168
  instructional approaches 172
Elaboration strategies 170
Engineering design, problem solving 357–383
Epistemic competence, design 369
Excuses, students with learning and social disabilities 128
Expectation test, teachers' knowledge and beliefs 298, 305
Experience and theory
  architects 337–355
  engineering design 357–383
  integrating professional knowledge 401–408
  medicine 269–289
  polycontextuality and boundary crossing 319–336
  sociopolitical and cognitive issues 409–417
  structure of professional knowledge 261–267
  teachers 291–318, 385–400
Experience-based training 294, 296, 308
Expertise
  polycontextuality and boundary crossing 319–336
  teachers' knowledge 393
Experts 264
Explanations, students with learning and social disabilities 125–141

Failure self-schema 64, 71
Fluid intelligence 40, 43, 44, 59

Gender, ability differences 37–62
General visualisation 40, 44, 51
  gender differences 52, 56

GRAK world 81
Graphic representation
  precursors of writing 1–19
  understanding 77–100
  basis for extrapolation, reflection and prediction 96
  comparative small scale relationships 93
  localised, serial interpretation 80
  naive drawing conceptions 86
  partially interpreted macro 90
  phenomenography 80, 84
  portraying localised patterns 91
  sophisticated spatial representations 95
Groupthink 321

Health workers, boundary crossing 324
Heuristic competence 363, 368, 374, 376, 380, 381
Hierarchical models of ability 40
  gender differences 50, 58
Homework assignment 405

Illness scripts 274, 280
Individual learning, computer-writing 104–122
Initial phenome isolation 196, 197, 199
Intelligence
  gender differences 37, 51, 55
  hierarchical models of ability 40

Justification, students with learning and social disabilities 128

Kindergarten, phonological awareness training 187–201
Knowledge
  application 393
  beliefs, teachers 292–312
  declarative and procedural 414
  design 362
  development and restructuring in medicine 269–289
  encapsulation 275
  experience for teaching 385–400
  professional 262, 263, 291, 401–408
  psychological concepts, architects 337–355
  restructuring through experience 391
  self, about others and universal 169
  structure as a learning outcome 171, 183

Learning
  conceptions 167, 168, 176, 181
  conceptual, procedural and perceptual 271, 275
  effective 168
  instructional approaches 172
  for later teaching 21–36
  from worked-out examples 23
  model 388
  social interaction 238
  to teach 395
Learning disabilities, explanations and accounts by teachers 125–141
Learning interaction 237
  cognitive apprenticeship model 240–256
  situational interpretations 239
Learning journals, impact on learning performance 172–184
Learning modules 395
Learning outcome, structure of knowledge 171, 183
Learning strategies 170, 173, 177
  reading comprehension, high and low achievers 143, 148, 154, 158, 161
Learning theory 395
Lindamood Auditory Conceptualization (LAC) test 190
Literacy, graphic representation in preschool children 1–19

Maps, understanding 79
Mathematics, gender differences 38
Mediators, teaching expectancy and learning 22, 30
Medicine, theory and practice 269–289
Memory span 44
  gender differences 53, 54, 57
Memory strategies, knowledge and use of text structure 203–219
Metacognition 167, 169
  instructional programs 172
  learning journals 172, 174, 176, 182
  strategies 170, 177
Modeling, cognitive apprenticeship 241, 243, 248, 256
Motivation, teaching expectancy 26, 28, 33

Negotiation of meaning 239
Nested factor model, gender and ability differences 41, 48

Organisation strategies 170
Outcome space 84, 97
Peer interaction 240
  computer-writing 104–122
Perceptual learning 271
Phenomenography, understanding of graphic representation 80
  outcome space 84, 97
Phonological Awareness Test (PAT) 190
Phonological awareness training, reading success 187–201
Polycontextuality, expertise 320–333
Practical training 261
Prior knowledge, learning for later teaching 31
Problem solving
  engineering design 357–383
  polycontextuality and boundary crossing 319–333
Problem trajectory 323
Problem vignettes, teachers knowledge and beliefs 297
Professional knowledge 262, 263, 401–408
  psychological concepts 337–355
  social and political context 409–417
  teachers 291, 386
Psychological concepts
  architects' knowledge 337–355
  problem solving in engineering design 359
Pupil case conference 129, 130

Reading
comprehension, high and low achieving children 143–164
comprehension and memory strategies 203–220
early phonological awareness training 187–201
Reading Comprehension Test 191
Recall organisation 213, 214, 218
Recall tasks 209, 211, 216
Reciprocity 239, 252, 255, 256
Reflection, cognitive apprenticeship 241, 243, 250
Reflective writing 172
Rehearsal strategies 170
Representation, graphic
preschool children 1–19
understanding 77–100
Revision, computer-writing, individual and cooperative 106–122

Scaffolding, cognitive apprenticeship 241, 243, 246
Scapegoating 134, 135
Self-assessed competence 363
Self-concept 63, 64
Self-description 66, 69, 72
Self-fulfilment 133, 136
Self-schema, academic success/failure 64–76
Signalling 209, 214, 218
Situated cognition 394
Social disabilities, explanations and accounts by teachers 125–141
Social interaction, student–teacher 238
Sound deletion 196, 197, 199
Spatial ability, gender differences 38, 56
Speed of Closure 44
Standardised Achievement (SA) tests 45
gender differences 49, 53
Story writing, word processors, individual and cooperative 109
Strategic training, high and low achievers 148, 154, 158, 161
Strategies, cognitive 170
Strategy, engineering design 360, 365
Students' self-concept, teacher treatment 221–236
Style, problem solving in engineering design 364, 376
Success self-schema 64, 66, 68
Systemic design, strategies 360

Teachers
boundary crossing 326
cooperation 128, 130
differential behaviour, students' perceptions 221–236
expectations 221, 222
students' self-concept 223, 227
experience and knowledge 385–400
explanations and accounts for learning and social disabilities 125–141
professional knowledge and beliefs 291–318
Teacher–student interaction, cognitive apprenticeship model 240–256
Teacher trainers 296, 311
Teacher Treatment Inventory (TTI) 222, 224, 225
Teacher expectancy, learning for 21–36
Technologically rich learning environment, cognitive apprenticeship 237–259
Text integration skill, measurement 153
Text processing, comprehension monitoring 145
Text structure, knowledge and use of 204, 207, 215
Theory–practice dilemma
architects 337–355
engineering design 357–383
integrating professional knowledge 401–408
medicine 269–289
polycontextuality and boundary crossing 319–336
sociopolitical and cognitive issues 409–417
structure of professional knowledge 261–267
teachers 291–318, 385–400
Topic plus details strategy 203

Verbal ability, gender differences 38
Verbal comprehension 40, 43
gender differences 54

Whole Language, phonological awareness 198, 199
Word processors, writing 102, 105
Worked-out examples, learning from 23, 27
Writing
precursors, graphic representation in preschool children 1–19
word processors, cooperative and individual 102–122

Printed and bound in Great Britain by Nuffield Press Ltd
